FEEDBACK

What Our Customers Say

★★★★★

I've Been Coming To A Plus Auto Care Repairing LLC For A While Now, And Every Visit Just Gives Me More Confidence In Their Work. The First Time I Brought In My Pajero, I Was Genuinely Impressed With How The Team Handled Everything — Honest Updates, No Unnecessary Charges, And A Smooth Handover. Recently, I Came Back With My Prado, And The Experience Was Just As Good, If Not Better. It's Rare To Find A Garage Where You Feel Your Vehicle Is In Safe Hands, But That's Exactly How I Feel Here. Keep Up The Great Work!

What People Say About Our Data Recovery Services

Nishad Tavakkeel
Works at Emirates Post - Sharjah

I was extremely satisfied with the services Data Magic provided. I consider that the time taken was a little excessive, even though I chose the non-urgent option. I was happy with the communications you provided - it gave me confidence that your services were genuine and your customer service was important. In the situation I found myself, with the potential loss of many photographs of a number of holidays taken over the past ten years, after my initial contact I felt that if there was any chance of recovery, your company would be successful with that task.

William Johnson
Wildlife Photographer - Dubai Marina

I'm a cinematographer and recently went to DataMagic to recover a dropped drive containing video files for my reel. What's great about DataMagic is so transparent about his process -- invited me to stick around and watch as he opened up the drive to see where the damage was, and beyond that talked me through the steps in the process. He was totally up-front about potential costs from the beginning, and made sure there were no surprises before I bit the bullet -- as a small business owner myself, I really appreciated this kind of customer service. Recovery was fast and most importantly, I got nearly every file back despite substantial damage to the hardware. Would comfortably recommend DataMagic to anyone and will go to DataMagic again if I stupidly drop another drive I haven't backed up :)
